**SOS** is available in three versions — **Basic**, **Lite** and **Premium**. Not every store has the same needs. These three versions are provided to meet the needs of small, medium and large stores. However, size alone should not be the determining factor of which version meets your needs. Take the time to look at the above chart to determine which product (with or without the optional add-ons for **Lite** or **Basic**) might best fit the needs of your business.

**All** the features listed **above** come with the **Premium** version. **SOS Lite** and **Basic** have fewer features. Features common to all three versions are listed at the beginning of the table above, on its previous page. Features available in the **Lite** but not in the **Basic** version are listed at the bottom of the table’s first page. Features available **only** in the **Premium** version and **not** in the **Lite** or **Basic** versions are listed above.

**SOS** offers users the flexibility of adding one or more of commonly asked for options for the **Lite** or **Basic** Versions, such as Check Printing in **SOS** or via *QuickBooks*, Dealer Rent Management, Inventory Tracking for all tag IDs, Consignment Inventory and Gift Certificate Sales/Tracking at the prices listed above.

Note that if you start off with **Basic** or **Lite**, you may at any time add on an optional module. You may also “trade up” from **Basic** to **Lite**, from **Basic** to **Premium** or from **Lite** to **Premium**. You will receive full credit toward the price of the higher product for the amount you had paid for your current version of **SOS**. Stores find such a policy very fair. When they are just starting out or if they expect to grow at a later date, they are able purchase very economically a useful, quality software product specifically designed for their business.

Sending **email** messages to some or all customers or to some or all sellers and sending **email** notifications of today’s sales or recent sales to the sellers are features **free** for **all** versions for one year from date of purchase and **free** for a year to any store after one year of use which pays the annual plan support fee for that year.
